

Programming Assignment 2

To prepare for coding the second program you will need to consider and study the programs listed below:

1. Copy a String;
2. Reverse a string, Input your student ID; Output your ID in an inverse order. Print both on the screen each of them in a single row;
3. Converting characters from upper to low and from low to upper case. Input your name in a low case; Output your name in upper case. Print both on the screen each of them in a single row;
4. Find the sum of an array of three 32 bit integer numbers. Prompt the user with:
 - please enter the first integer: ;
 - please enter the second integer: ;
 - please enter the third integer: .

Print the result as follows:

- the sum equals to: .

As we discussed, during our last lecture, you will code your program in the CS Lab as an self-dependent work on April 02,2008-during the second part of the lecture. As usual we will meet In Journalism 129.
